My preferred method of contact is by email. I will respond to all emailed questions within 24 hours Mon-Fri. I do not respond to emails over the weekend.

Course Description:
This course introduces students to the application of business analytics, utilizing both critical thinking and statistical tools. It focuses on helping students to develop quantitative analytical skills valuable for a wide range of business fields, especially on consumer-related problems. As with the new developments of information technology and advancements in analytical tools, the marketing profession is witnessing a shift away from intuitive decision making to data-analytics based decisions. Companies are increasingly competing on analytics and are in need for people with both managerial expertise and analytical skills. This course intends to help students develop these skills.

This course is designed to help MBA/DSBA students to move from qualitative to quantitative strategic decision making through focusing on consumer-related problems and (for students with data analytics skills) to expand their professional and academic abilities in consumer related topics. It not only introduces students to a variety of marketing decision models, but also teaches them how to estimate these models using statistical software (SAS/STATA/Excel), and how to apply them for decision recommendations. Specifically, this course will introduce a variety of quantitative models to improve marketing decision making in such areas as market response, customer segmentation, customer targeting, brand positioning, as well as pricing and promotion decisions.

This course is designed to be an in-person class, so if you cannot attend most of the classes, considering taking an online class instead.

Prerequisites:
An introductory class in statistics/regression and working knowledge of MS Excel. Experience in any form of computer programming is always a plus but not required. However, the single most important prerequisite for the class is a positive attitude towards learning.

Students are expected to have basic computer skills including using the Internet, specifically, the Web. Students should be able to interact with the course site and resources in Canvas (posting to
Canvas discussion board, submitting assignments, etc.). We will be using Microsoft Excel (including Excel Solver and the Analysis) and Stata. The minimal technical skills required include the ability to:

❖ organize and save electronic files
❖ find and use web resources
❖ use email and attach files
❖ check email and Canvas daily
❖ download and upload documents via email and Canvas
❖ prepare reports using a word processor
❖ create and modify spreadsheets in Microsoft Excel
❖ use basic spreadsheet functions and manipulate data.

Class Hours:
Wednesdays: 5:30pm – 8:45pm

Course Objectives and Approach:
This is a hands-on and application-orientated course embracing the principle of learning by doing. Each analytic model that we cover has software (advanced Excel and Stata) implementation, and a problem/case whose resolution can be enhanced through the use of data. Statistical tools covered in the class will range from simple data analysis and visualization, to advanced methods such as non-linear regressions, choice model, and mining of ‘unstructured’ data. Our emphasis will be on applications and interpretation of the results for making business/policy decisions. To master each major tool introduced in this course, students should go through a four-stage problem solving process: analyzing the business problem, selecting and estimating relevant models, interpreting estimation results, and making decision recommendations. To master this four-stage problem solving process, students are expected to struggle at times. Notably, a major requirement is that students apply analytics techniques to their group project to solve typical marketing problems of their own choice. The semester-long project is intended to train students for the four-stage process of problem solving.

Regardless of your prior background, focus of this course should be on continuous improvement by benchmarking your own progress. In particular, you will get most of this class by focusing on (a) removing your fears (if any) of data analysis, (b) enhancing your toolkits, and (c) (most importantly) internalizing the broad analytical intuition.

The content of the course is covered through lectures and the students’ own efforts. Materials presented in class are a blend of the topics covered in the textbook and other sources.

Classroom Rules

❖ Please keep an eye on your UNCC email, as I will communicate with you through it as well as visit the course website periodically to download the hand-outs, assignments and other course materials.
❖ If you experience any technical issues in our online environment, reach directly to the IT Service Desk at: Phone: 704-687-5500 Email: help@uncc.edu Webpage:
Electronic video, image capture, and/or audio recording is not permitted during class, whether conducted in person or online, unless the student obtains permission from the instructor. If permission is granted, any distribution of the recording is prohibited. Students with specific electronic recording accommodations authorized by the Office of Disability Services do not require instructor permission; however, the instructor must be notified of any such accommodation prior to recording. Any distribution of such recordings is prohibited.

**Textbooks & References:**

- **Textbook:**
  You are not required to buy any textbook. All the class materials will be provided through our Canvas course website. For those who want to go deeper in learning, the following books are recommended as reference books.

  Venkatesan, Rajkumar, Paul Farris, and Ronald T. Wilcox (2015), *Cutting-edge marketing analytics: real world cases and data sets for hands on learning*, Pearson Education.

  If you don’t have any prior knowledge on statistics and econometrics, you can use the following textbook that I use for my undergraduate class.

- **Software**
  You will need access to the Microsoft Excel 2016, with “Data Analysis ToolPak” properly installed. Note: It is your responsibility to have the software ready before Feb. 15th. The details about how to install this software are provided in Appendix to this syllabus.

  Details on how to access Stata and SAS will be provided in class.

- **Course material**
  Presentation slides and other course materials will be available for download from your personal UNCC Canvas account, accessible at http://canvas.uncc.edu/ for all registered students. Course material will be posted periodically on the course page (UNCC Canvas) as we progress through the course. All the grades on homework and exams will be available on your Canvas account. Student are required to check their UNCC email ID and Canvas for important notifications.
Grading Scale:

<table>
<thead>
<tr>
<th>Evaluation</th>
<th>200</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework Assignments</td>
<td></td>
</tr>
<tr>
<td>Individual/Group Project</td>
<td>250</td>
</tr>
<tr>
<td>----------------------------------------</td>
<td>-----</td>
</tr>
<tr>
<td>Attendance</td>
<td>150</td>
</tr>
<tr>
<td>Exam I</td>
<td>200</td>
</tr>
<tr>
<td>Exam II</td>
<td>200</td>
</tr>
<tr>
<td>Bonus points for posting and answering fellow students’ questions on Canvas</td>
<td>Proportional to number and quality of postings</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>1000+</td>
</tr>
</tbody>
</table>

**Homework Assignments (20%)**: There will be multiple exercises throughout the semester. In each exercise, students are expected to solve specific marketing analytics problems relevant to corresponding lectures.

**Group Project (25%)**: One group project will be assigned. The case is a small group assignment. You may work in groups of 3-4 people (It is acceptable to work individually.) All members of a group will receive the same grade.

**How to find team members**: There are several ways for you to consider finding team members.
- First, you may reach out to people you know in the class to form a team.
- Second, you may use the “Discussions” board on Canvas to communicate with your peers to find teammate(s) or join a team.
- Any other ways.
Since members of a group receive the same grade, I do not force the team formation. If you cannot find a teammate, you will have to do it individually (which is totally doable). One team only needs to submit ONE copy of work to Canvas for grading. It is each team member’s responsibility to ensure his/her name is on the file (For team members who do not contribute, other members have the right not to include their names in the report. They then have to work out and submit their own work to earn the grade). Grade will not be granted if your name is not on the file.

**Class Attendance (15%)**: You are expected to go over all the course materials and actively participate in class discussions. Class participation (both quality and frequency) accounts for 15% of your final course grade and is used to reward students for positively contributing to the class learning environment. Details will be discussed in class.
- 1% for introduce your self
- 4% for rewarding (finish all the checkup questions and actively participate in class sessions)
- 10% for Weekly Checkup Questions

**Individual Canvas Exams (40%)**: The exams will be conducted during class session. The exams will cover short exercises pertaining to each topic covered and will be similar in spirit to the case studies/exercises covered in the class. The exams are open book, open notes, and open internet. There will be no make-up quiz for any reason.
- Exam I will be given during regular class meeting time. The final exam (Exam II) will be administered according to the UNCC Final Examination Schedule. Exams will be open book and open notes. You will complete each exam on Canvas. Only one attempt is allowed for each exam.
- Note that these exams are timed, and it is urged that you study the required materials
carefully before the exam.

- Students will NOT be able to make up for an exam after the scheduled deadline.
- Exams have to be your individual work and any form of collaboration is not allowed. Sharing, emailing, or copying answers will be considered academic misconduct. Any exams not taken on the scheduled day require a written note (e.g., doctor’s note) certifying your inability to take the exam on the scheduled date and time.
- Exams will cover homework and lecture notes consistent with the tentative class schedule. The format of the exams will be multiple-choice and will include conceptual (e.g., non-mathematic) problems as well as problem-solving and numeric manipulation.

**Turning in Homework and Projects:** All written projects and assignments should be submitted electronically via canvas on the due date. w0% of the assigned grade will be deducted for the late assignments/each day till reach 0 point.

**Grading scale:**

Your overall numerical grade will be rounded to the nearest integer and then converted to a letter grade according to the following table. Once the course grades are released, requests without clear evidence for a change would be denied.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>A</th>
<th>B</th>
<th>C</th>
<th>D</th>
<th>F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Range of Numerical Grade</td>
<td>90+</td>
<td>[80, 89]</td>
<td>[70, 79]</td>
<td>[60, 69]</td>
<td>&lt; 60</td>
</tr>
</tbody>
</table>

**When You Need Help**

Please reach out to me if you have any questions about course material or difficulties with the concepts. This includes questions during class, office hours or appointments, by e-mail, before you hand in assignments, and after you receive your grade. I am on your team. Your preparation and willingness to interact with me really helps to keep us on track and in tune with each other during the lecture sessions.

Comments on Examinations, Homework, and Attendance:

- All homework and tests will be delivered and submitted through Canvas.
- **Homework:** It will be assigned on Canvas. Each student should work on the assignments independently. Further details on the assignments are forthcoming. You are expected to submit on or before the due date. No excuse for late submission will be considered. **No late homework will be accepted.** Details on homework will be given in due course.
- **Class participation:** Each class period, several questions about the material and related exercises will be asked. Your responses will be given using among other mechanisms, the polleverywhere app, zoom chat, and microphone. You must be “physically virtually” present during class and use your laptop, desktop, tablet, cellphone, etc. to answer and earn
your participation points. The questions will focus on the material covered in class and the
difficulty level will vary. Attempting to answer questions when not “physically virtually” in
class or sharing answers with students not “physically virtually” in class will be considered
cheating and treated as a violation of the student academic integrity code. Participating in
class is a great opportunity for you to engage with the material in real time, receive
immediate feedback on your work, prepare for homework and exams, and enjoy the class!
If you experience any technical issues with polleverywhere, reach out to the IT Service
Desk at help@uncc.edu and copy me in that email. You have a period of one week to get
the issue fixed (previous experience shows this is more than enough time for IT to resolve).
• **Attendance is not mandatory.** However, note that previous groups’ experiences show that
students missing multiple classes tend not to do as well in the corresponding exam as students
with full attendance rates. Class participation points (20% of your final grade) cannot be
made up or excused. **No exceptions.**
• The homework and in class problems will serve as an excellent reference for the content and
structure of the exam questions.
• Students who are unable to attend a scheduled test **must present the instructor with
documentation of a valid medical, family, or personal emergency before the test** to
obtain permission. Make-up examination will be scheduled (except for the final exam).
Students who fail to make-up a missed examination, or fail to attend the scheduled final exam,
will receive a score of zero for all missed work.
• The standards and requirements set forth in this syllabus may be modified at any time by the
course instructor. Notice of such changes will be announced in class or by written or
email notice.

---

**Course Policies:**

**Syllabus Revision:**

The standards and requirements set forth in this syllabus may be modified at any time by the
course instructor. Notice of such changes will be announced in class or by written or
email notice or by changes to this syllabus posted on the course website at

**Classroom Conduct:**

I will conduct this class in an atmosphere of mutual respect. I encourage your active participation
in class discussions. Each of us may have strongly differing opinions on the various topics of
class discussions. The conflict of ideas is encouraged and welcome. The orderly questioning of
the ideas of others, including mine, is similarly welcome. However, I will exercise my
responsibility to manage the discussions so that ideas and argument can proceed in an orderly
fashion. You should expect that if your conduct during class discussions seriously disrupts the
atmosphere of mutual respect I expect in this class, you will not be permitted to participate
further.

**Academic Integrity:**

All students are required to read and abide by the Code of Student Academic Integrity.
Violations of the Code of Student Academic Integrity, including plagiarism, will result in
disciplinary action as provided in the Code. Students are expected to submit their own work, either as individuals or contributors to a group assignment. Definitions and examples of plagiarism and other violations are set forth in the Code. The Code is available from the Dean of Students Office or online at: http://legal.uncc.edu/policies/up-407. Faculty may ask students to produce identification at examinations and may require students to demonstrate that graded assignments completed outside of class are their own work.

**Course Credit Workload:**

This 3-credit course requires 3 hours of classroom or direct faculty instruction a week and 6 hours of out-of-class student work each week for approximately 15 weeks. Out-of-class work may include but is not limited to: required reading, library research, written assignments, and discussion posts.

**Non-Discrimination:**

All students and the instructor are expected to engage with each other respectfully. Unwelcome conduct directed toward another person based upon that person’s actual or perceived race, actual or perceived gender, color, religion, age, national origin, ethnicity, disability, or veteran status, or for any other reason, may constitute a violation of University Policy 406, The Code of Student Responsibility. Any student suspected of engaging in such conduct will be referred to the Office of Student Conduct.

**Diversity**

The Belk College of Business strives to create an inclusive academic climate in which the dignity of all individuals is respected and maintained. Therefore, we celebrate diversity that includes, but is not limited to ability/disability, age, culture, ethnicity, gender, language, race, religion, sexual orientation, and socio-economic status.

**Disability accommodations**

UNC Charlotte is committed to access to education. If you have a disability and need academic accommodations, please provide a letter of accommodation from Disability Services early in the semester. For more information on accommodations, contact the Office of Disability Services at 704-687-0040 or visit their office in Fretwell 230.

**Title IX:**

Title IX UNC Charlotte is committed to providing an environment free of all forms of discrimination and sexual harassment, including sexual assault, domestic violence, dating violence, and stalking. If you (or someone you know) has experienced or experiences any of these incidents, know that you are not alone. UNC Charlotte has staff members trained to support you in navigating campus life, accessing health and counseling services, providing academic and housing accommodations, helping with legal protective orders, and more. Please be aware that
many UNC Charlotte employees, including all faculty members, are considered Responsible Employees who are required to relay any information or reports of sexual misconduct they receive to the Title IX Coordinator. This means that if you tell me about a situation involving sexual harassment, sexual assault, dating violence, domestic violence, or stalking, I must report the information to the Title IX Coordinator. Although I have to report the situation, you will still have options about how your case will be handled, including whether or not you wish to pursue a formal complaint. Our goal is to make sure you are aware of the range of options available to you and have access to the resources you need. If you wish to speak to someone confidentially, you can contact any of the following on-campus resources, who are not required to report the incident to the Title IX Coordinator: (1) University Counseling Center (counselingcenter.uncc.edu, 7-0311); (2) Student Health Center (studenthealth.uncc.edu, 7-7400); or (3) Center for Wellness Promotion (wellness.uncc.edu, 7-7407). Additional information about your options is also available at titleix.uncc.edu under the “Students” tab.

**Religious Accommodation:**

Students who, acting in accordance with this Policy, miss classes, examinations or other assignments because of a religious practice or belief must be provided with a reasonable alternative opportunity to complete such academic responsibilities. It is the obligation of students to provide faculty with reasonable notice of the dates of religious observances on which they will be absent by submitting a Request for Religious Accommodation Form to their instructor prior to the census date for enrollment for a given semester. The census date for each semester (typically the tenth day of instruction) can be found in UNC Charlotte’s academic calendar.

**Student Grievances:**

Student Grievances Students enrolled in courses at the University of North Carolina at Charlotte who would like to file a complaint regarding their experience may do the following: 1. Refer to the UNC Charlotte Student Grievance Procedure. Students may also contact UNC Charlotte’s regional accrediting agency, the Southern Association of Colleges and Schools Commission on Colleges. 2. Students residing outside of North Carolina while attending UNC Charlotte may file a complaint in their state of residence. As required by federal regulations, students are directed to the list of resources here, compiled and updated by the State Higher Education Executive Officers.

**Withdrawals:**

Students are expected to complete all courses for which they are registered at the close of the add/drop period. If you are concerned about your ability to succeed in this course, it is important to make an appointment to speak with me as soon as possible. The University policy on withdrawal allows students only a limited number of opportunities available to withdraw from courses. It is important for you to understand the financial and academic consequences that may result from course withdrawal.

**Incompletes:**
The grade of I is assigned at the discretion of the instructor when a student who is otherwise
passing has not, due to circumstances beyond his/her control, completed all the work in the
course. The missing work must be completed by the deadline specified by the instructor, and no
later than 12 months. If the I is not removed during the specified time, a grade of F, U, or N, as
appropriate is automatically assigned. The grade of I cannot be removed by enrolling again in the
same course, and students should not re-enroll in a course in which they have been assigned the
grade of I. University policy addressing Incompletes.

Student Support:

Disability Support Services:

Students in this course seeking accommodations to disabilities must first consult with the Office
of Disability Services and follow the instructions of that office for obtaining accommodations.
The Office of Disability Services works with current undergraduate and graduate students along
with prospective students to ensure equal access to UNC Charlotte's campus and educational
programs.

All services are dependent upon verification of eligibility. Once approved for services, students
receive accommodations which are based upon the nature of an individual's disability and
documented needs. Students are strongly encouraged to register or check-in for their
accommodations with a Disability Services counselor as soon as they have registered for
classes. Accommodations are not retro-active and will not begin until the student notifies his or
her faculty by providing the Letter of Accommodation.

Please visit the Office of Disability Services at for additional resources, email questions
to disability@uncc.edu, or call 704-687-0040 (tty/v) for more information.

Student Support Services:

Be sure to take advantage of the wealth of resources and support available at UNC Charlotte.
Some of the resources available to you include the University Writing Resource Center,
University Counseling Center, and the J. Murrey Atkins Library.

- University Center for Academic Excellent (UCAE) | (704) 687 7837 | uncc-

APPENDIX 1

Installing the Analysis ToolPak in Excel for Mac Users

Analysis tool pack is the “add in” in excel, which is required to perform statistical analysis. You can install this add in by performing the following steps.

Open a blank excel sheet.

Now go to the Tools dropdown and select Excel Add-ins.....
Pressing “Excel Add-ins” will open Add-ins window

In the Add-ins window check the ‘Analysis ToolPak’ box and press OK
To confirm that you have successfully installed the “Analysis TookPack”, go to the Data Tab and look for Data Analysis option on the upper right corner of the excel sheet. If you see the Data Analysis button that means you have successfully installed the package.

Now press Data Analysis button and explore various statistical analysis options in the Data Analysis window.
Installing the Analysis ToolPak in Excel for Windows Users

Analysis tool pack is the “add in” in excel, which is required to perform statistical analysis. You can install this add in by performing the following steps.

Open a blank excel sheet and press file.

Now press options.
Pressing “options” will open Excel Options window

In the excel options window press Add-ins
A new window will open. In this window select “Analysis ToolPak” as shown below.

A new window named as “Add-ins” will open up. Check all the boxes and press OK.
To confirm that you have successfully installed the “Analysis ToolPak”, go to the Data Tab and look for Data Analysis option on the upper right corner of the excel sheet. If you see the Data Analysis button that means you have successfully installed the package.

Now press Data Analysis button and explore various statistical analysis options in the Data Analysis window.
APPENDIX 2
Remote Access to Stata & SAS

1. log in https://uncc.apporto.com/, you should see this screen

2. Click on Launch, it will open a new window with your virtual desktop, like this one

3. Create a folder on this virtual desktop, name it “stata” (or whatever name you want, but no space in the name)
4. Download files into the Stata folder: you can either open a browser on the virtual desktop (not on your personal computer), then download the files from Canvas, or you can use the upload/download tools (cloud shapes with arrow) at the top of the virtual desktop to transfer files from your personal computer.

5. Open Stata in the virtual desktop (hit the statistics icon), and use it as on your personal computer, except that you have to specify the paths as in your virtual computer.

For instance, you can click file ➔ open: then desktop ➔ Stata (or whatever name you gave to that folder), then you should be able to open the .dta file you put in it (follow step 4).
