SDS students,

We can't believe the spring 2021 semester is coming to an end! As a reminder, UNC Charlotte announced that they will host in-person commencement ceremonies for the May 2021 graduates in the Jerry Richardson Football Stadium May 13, 14 and 15.

Members of the Class of 2020 will also be invited to participate in these ceremonies and all graduates will be able to invite two (2) guests. The ceremonies will be live streamed and recorded. Be on the lookout next week (April 7th) for an announcement of the specific ceremony dates and times.

Finally, we know some of you are looking for internships (including our undergrads). Companies are still sending opportunities for both M.S. and B.S. student internships so make sure to watch for these and apply!

As always, please reach out to Josh Hertel or Carly Mahedy if you have any questions.
Student Volunteers Needed: Analytics Frontiers Conference 2021

The 7th annual Analytics Frontiers conference is ONE WEEK away!

The School of Data Science will be selecting eight to ten DSBA and HIA students who are interested in volunteering and attending this year's Analytics Frontier Conference (AFC) on Thursday and Friday, April 22nd and 23rd.

If you are interested in volunteering for one or both days this year, and are available from 10:00 a.m. to 3:00 p.m. Please complete the form below by noon on Friday, April 16th.

Volunteer positions will be assigned by Monday, April 19th. Students assigned a role will be contacted directly by email with more information regarding their duties.

*Student volunteers will have the opportunity to attend the Analytics Frontiers conference for FREE.*
Summer 2021 Internships- DSBA and HIA

On February 24th, SDS held a workshop on best practices for securing an internship. You can replay the session [here](#). For more information on the internship requirements, how to secure a placement, and/or how to submit a proposal, please visit the program websites:

- [DSBA Internship](#)
- [HIA Internship](#)

Proposals for a summer 2021 internship must be submitted no later than **Friday, May 14th**, ten days prior to the start of Summer Session classes.

---

**Summer School Course Offerings**

**DSBA 6520: Network Science**

**Description:** Throughout our lives, we encounter data with various degrees of structure which can be relied upon when attempting to make systematic or algorithmic evaluations of that data. And it is the structure (or lack thereof) of that data that determines what algorithms or operations can be performed on said data, and by extension, what insights can be gained. In this class, you’ll learn how to use industry-standard algorithms, tools, and models which take advantage of data that is structured as a graph/network as well as the rules and theory which govern Network Science to uncover hidden interconnected insights in data.

**DSBA 6010: Special Topics in DSBA: From Data to Decisions: Informed Leadership**

**Description:** The goal of this course is to help students see the use of data as an asset; especially how analytics helps leaders/managers make decisions by producing actionable insights for them. **Business Analytics Elective**

---

**Featured Special Topics Course for Fall**

**DSBA 6010: Special Topics in DSBA: Text Mining and Information Retrieval - Saturday Mornings, Center City Building**

**Instructor:** Dr. Niu

**Semester:** Fall 2021

**Description:** Text data play an essential role in our lives. Since we communicate using natural languages, we produce and consume a large amount of text data every day on all kinds of topics. The explosive growth of text data makes it impossible for people to consume all the relevant text data in a timely manner. The availability of text data has also created unprecedented opportunities to leverage computational and statistical approaches to turn raw
data, especially raw text data, into actionable knowledge.

This course covers general computational techniques for analyzing large amounts of text data as well as basic techniques for information retrieval. By introducing text mining (TM) and information retrieval (IR) in a unified framework, this course emphasizes the importance of integration of IR and TM needed to build the two major types of text information systems, i.e., search engines (such as Google, MS Bing, etc) and text analytics systems, for text information access and text analysis. **Data Science Elective**

---

**New Special Topics for Fall 2021**

**DSBA 6010: Special Topics in DSBA: Data Privacy - Wednesday Afternoons, Main Campus; Dr. Fan**

**Semester:** Fall 2021

**Description:** Personal data today is aggregated at large scales, increasing the risk of privacy violations or breaches in critical sectors (e.g., health care, automation, and finance). Current laws such as HIPAA and GDPR protect personal data in the United States and around the world. The course will cover privacy-enhancing technologies from data de-identification to the state-of-the-art differential privacy research (e.g., deployed at Apple and the Census Bureau). We will also include broader discussions around topics such as data governance, ethics, and algorithm fairness. Material will touch on issues and methodologies from data mining/machine learning, databases, cryptography, distributed systems, law, policy, medical informatics, and statistics. **Data Science Elective**

**DSBA 6010: Special Topics in DSBA: StoryTelling - Wednesday Evenings, Center City Building; Dr. Hague**

**Semester:** Fall 2021

**Description:** Learn how to take your analytics and data science results and turn it into a presentation to senior leaders in your company. You will learn how to simplify your visualizations as verbally present your materials. **Business Analytics Elective**

---

**CGL Fall 2021 GRAD Courses**

**UNC Charlotte’s Center for Graduate Life** is offering a host of elective courses for the fall 2021 semester.

Interested students can learn more about the different course offerings below.
A commencement announcement email was sent to May 2021 graduates and members of the Class of 2020 announcing that we will hold in-person ceremonies in Jerry Richardson Football Stadium May 13, 14 and 15.

For questions regarding these emails, please use the links below to help answer questions you may have.

**Novant Health: STM Academy Speaker Event**

When: April 20th, 3:30 p.m. - 4:30 p.m.

The STM Academy is excited to have a Novant Health HR Talent Acquisition Specialist speak to students about navigating the application process, negotiating salary, and more!

Watch the video [here](#) to learn more.

**Meeting Password:** 977640

Join Zoom Meeting
Virtual Tech Job Expo

When: April 21st, 8:30 a.m. - 4:30 p.m.

The EXPO provides an opportunity for employers to connect and network with those seeking tech jobs, internships and careers in tech. For employers seeking to expand their pipeline of tech talent, the EXPO is an efficient and cost effective solution to support their recruitment efforts.

For candidates seeking to work in a tech role or to support a tech company/operation (finance, operations, sales, marketing), the EXPO is a great avenue in which to learn more about the tech employers in NC and job opportunities.
